

Benefits of participating in the American Spine Registry (ASR)

Participation enables healthcare providers to benchmark outcomes, drive quality improvement, and contribute to critical research that advances spine care

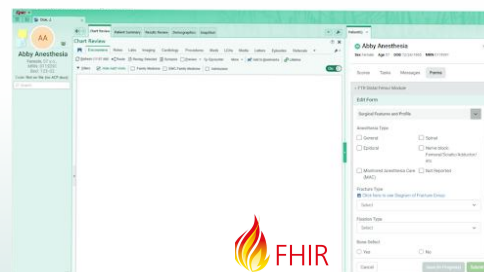

What value do participating sites gain from the ASR?

-  **Improve Patient Care & Safety:** Gain actionable insights to enhance treatment strategies and outcomes.
-  **Leverage Quality & Outcome Insights:** Benchmark your institution's performance against national datasets to identify trends, uncover gaps in care, and implement targeted improvements.
-  **Advance Spine Care:** Contribute to the future of spine care by sharing data to drive advancements.
-  **Showcase Excellence & Quality:** Demonstrate high standards for payers, certifications, and accreditations.

Streamlined participation with PatientIQ:

-  **Automate Data Collection:** pIQ seamlessly pulls required data fields via FHIR Epic APIs with no need for IT or FTE resources.
-  **Embed Forms in the EHR:** EHR integration allows clinical teams to capture Vanguard data such as procedure performed at each level (e.g., decompression fusion) and primary patient symptom, directly in the patient's chart.
-  **Enhance Analytics:** pIQ analytics enables performance benchmarking and patient risk identification.
-  **Simplify Submission:** pIQ aggregates, validates, and submits data directly to the ASR on your behalf.

PatientIQ's fully automated ASR workflow eliminates manual data collection, IT demands, and workflow disruptions
