Optimized Integrations

# Epic EHR-Integrated Outcomes Program

Automate PRO collection, embed patient insights at the point-of-care, and seamlessly extract relevant data elements from your EHR with PatientIQ's optimized integrations.

The PatientIQ Score's Tab embedded in Epic for point-of-care insights

## Integration Benefits

✅ Unburdens clinical staff from manual patient enrollment

✅ Arms providers with point-of-care insights into the patient experience

✅ Enhances data collection to support academic research, regulatory compliance reporting, registry participation, and quality improvement initiatives

# PatientIQ's EHR integration solutions

### Hl7 SIU + ADT feeds
### Supports automated PRO pathways enrollment

This integration receives patient information at the time of scheduling. Patients are automatically enrolled in appropriate PRO pathways based on their procedure information. This system unburdens clinical staff and maximizes patient compliance.

### Frontend SMART on FHIR application
### Supports point-of-care insights directly in the EHR

This integration embeds individual patient scores into the side-panel within the EHR, elevating the patient perspective right at the point-of-care.

### Backend FHIR application
### Supports enhanced data collection

This integration extracts relevant patient data from the underlying database in the EHR like CPT codes, diagnosis codes, height, weight, etc. The resulting data sets support advanced patient risk stratification, academic research, regulatory compliance reporting, registry participation, and quality enhancement initiatives.
